Developed a cross-platform mobile app using React Native CLI and NativeWind for a UK-based client. Implemented a timed splash screen followed by a dynamic main screen displaying day, time, image, content, and audio playback, all driven by backend APIs. Focused on responsive UI, real-time content updates, and smooth performance for production users.

Country Population Website

[Link to Demo](#)

Developed a responsive web application using React and Tailwind CSS that fetches real-time country data from public APIs. Implemented dynamic rendering of country-wise population and related details with fast loading and smooth UI interactions. Focused on clean component structure, efficient API handling, and mobile-first responsive design for consistent performance across devices.
